

Dear Resident

## PERKIOMEN TOWNSHIP

Perkiomen Township awarded a contract for the proposed road work to be completed in 2018. On or about April 16, 2018, the contractor will begin base repair work and concrete repairs to a culvert located under Bridge Street. Overlay of both roads will follow. Below is the proposed road work:

### ROAD PROJECTS

- **BRIDGE STREET** – From Seitz Road to 1,000 feet past Exmoor Road. This work will include select base repair and an overlay; installation of pavement base drain in select locations; and concrete repairs to a box culvert;
- **COLONY DRIVE** – Entire length from Bridge Street to and including both Cul-De-Sacs. This work will include select base repair and an overlay;

The Bridge Street base drain and base repair work will require portions of Bridge Street to be closed to through traffic between the hours of 9:00 a.m. and 3:00 p.m. We expect this work to take approximately three days. The rest of the work will require traffic control that will include closing one lane and the flagging traffic to effect one-way traffic at times. This will likely result in minor traffic delays between the hours of 7:00 a.m. and 4:00 p.m. There will also be limited access to/from driveways at times. The contractor will advise you of driveway access restrictions. It is anticipated that the overall project will take approximately three weeks (depending on weather).

# PERKIOMEN TOWNSHIP MUNICIPAL AUTHORITY

Recently, the Perkiomen Township Municipal Authority awarded a contract for light cleaning and televising of the sanitary sewer mains in the Birchwood Development to Diversified Infrastructure Services, Inc. Some of these sanitary sewer mains pass through the parking lot areas and the open space in the Birchwood Development. Currently, there is no time line as to when that work will be completed.

**BIRCHWOOD DEVELOPMENT:** The project will include the light cleaning and televising of the 8” sanitary sewer mains within the Birchwood Development. It is anticipated that the project will take approximately 3-4 days to complete. The contractor will be working between the hours of 7:00 am and 4:00 pm, Monday through Friday. The contractor may be taking up parking spaces for short periods of time in order to access the sanitary sewer manholes to complete the cleaning and televising project.

Respectfully yours,

*Cecile M. Daniel*
